# FRUITS, TREES FLOWERS AND EVERGREENS

— Fall 1948 —

WITH PRIDE WE  
INTRODUCE THIS NEW

## Elm "Coolshade"

(A Sensational New Hybrid Chinese Elm)

Can be grown as shown or trunk trimmed high.

A new hybrid Chinese Elm developed by us in an effort to get a more practical rapid growing shade tree of beauty and permanence (inset shows ordinary Chinese Elm).

(See page 2 for complete description.)

THE NEW *Elm "Coolshade" . . .*

Undoubtedly the most beautiful Elm we have ever seen. It is a most practical all-purpose shade tree. Unlike the American Elm, it does not have large lateral limbs that are dangerous when overhanging the residence. It may be planted close to the house without worry.

IT'S TOUGH—does not break in the wind and under the burden of ice and snow like the ordinary Chinese Elm.

IT'S BEAUTIFUL—forms a compact tree, somewhat resembling the Hard Maple in form. (See illustration, front cover.)

IT'S HARDY—like all Chinese Elm, it is hardy and drought resistant. It is not subject to the Dutch Elm disease or Phloem neucrosis which affects the American Elm.

IT'S CLEAN—does not shed leaves early and cause an unsightly lawn—holds its leaves late into the fall.

IT'S RAPID IN GROWTH—not quite so rapid as ordinary Chinese Elm, however produces an abundance of deep green foliage affording a complete shade—a "COOLSHADE"—and a truly beautiful shade tree.

WE SINCERELY RECOMMEND THIS AS THE BEST ELM WE HAVE EVER KNOWN. Grows 35 to 50 feet high.

# Privet the Living Fence

Plant 10 to 12 in. apart. Prune back to within 4 to 6 in. of the ground to make them branch low and thickly. The second spring, if not sufficiently thick, again prune back, a little higher. After that prune to keep the hedge the height and width desired, usually about three times a year. Avoid severe pruning after the middle of August.

**Privet, Amur River North; *Ligustrum amurense*.** A rapid growing Privet of upright habit, taking the place of California as it is reliably hardy here. Very fragrant small white flowers like tiny lilacs in late May, followed by black berries; seldom blooms when pruned as a hedge.

ROSES and many other plants not offered in our Fall Booklet will appear in this Large Diamond Jubilee Catalog at special prices.

# Hardy Vines - NATURES DRAPERY

When planting cut the tops back severely, particularly clinging vines such as Euonymus radicans and Boston and English Ivy, as it is the new growth which clings. Twining vines must have a support they can twine around. If the soil near the foundation is poor, replace with good soil.

If by parcel post, add 4c each—not less than 15c per package.

**Bittersweet, Oriental.** A high climbing vine; orange-yellow seed pods reveal bright red seed along the branches in autumn; thrives in sun or partial shade; twining.

## Beautiful Evergreens

Specimens every one. Dug with a ball of earth and wrapped in burlap. They are the pick of the nursery row and sure to please. B. & B. indicates Balled and Burlapped.

Our evergreens are grown with plenty of room and are compact, well filled trees of their size and variety. They have been transplanted and root pruned and are well rooted. They are not grown rapidly and soft but are firm and easily transplanted. They are liberally graded.
